LEXUS

*Options shown. **Advanced Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. Driver Attention Monitor is designed to alert the driver if a potential hazard is detected ahead and the driver's face appears to be looking away. The Active Radiation Detection System is designed to help reduce the impact speed and damage in certain head-on collisions. They are not collision avoidance systems and are not substitutes for safe and attentive driving. System effectiveness depends on many factors. See Owner's Manual for details. ©2018 Lexus.
