## The Polymath

How do you shop for the tech-savvy gent? If it's got a touchscreen, he'll like it. But if it pairs with denim, he's going to love it.

Jack of all trades, master of... fun? You know who we're talking about. This high-tech dabbler has a taste for eclectic interests, and he always has a blast. And when he's not using his hoverboard to fine-tune his drone to water his succulents, he's looking for something slick and comfortable to wear.

## The Good Sport

Season tickets are a pretty big ask. But that doesn't mean you can't make his day with some very sporty duds.

Because the pursuit of sport is a full-time job, and he needs the proper attire to complement his fantasy-leagueing, wing-gobbling, ultra-competitive lifestyle. In gear-chilly months like January, and the big spring openers are no picnic either... well, ok, those are actually pretty nice, but he could still use some jeans.
