1. Perfect Match

2. Tween Time Goes Round

"If you have white hairs in your beard, your eyebrows, or just your hair, you can use this. They are colored sticks that come in any hair color. Wet the sticks, take a brush, and rub it to get your natural color. Then take the brush and go through your beard. You can rub it in as well, but make sure that it doesn't get on the skin. If you have grey hairs, and you don't like it, you put this on and feel better about going out into the world."

3. Toppo

"This is magic. If I would forget this when I go to work, I wouldn't know what to do. It's very fine hair fiber that covers the scalp. It comes in every hair color. It's so easy to do it on your own."

4. Control Pests by Area

"I like Aveda products. They have something called Control Paste. It's easy to use, easy to control, and light. I like using Aveda products because everything is pretty much natural. Control Paste is very soft. Always wear the product in your hands first. Then put it in the hair. Men have a tendency to have more volume on the sides, so always put a little more Control Paste on the sides to tame it. And then on the top, do whatever you like, create volume, put it down, or texture it."

That's all there is to it, folks! If you have any tips or questions, give us a shout in the comment section below, and stay tuned for more from this gorgeous celebrity groomer.
