MAKE YOUR MONEY LAST

BY AMANDA GENGLER,

PHOTOGRAPH BY TRAVIS RATHBONE

THE ULTIMATE MEASURE OF FINANCIAL SUCCESS isn't a fat salary or a portfolio of hot stocks. It's having enough money to support the retirement you've dreamed of, no matter how long it lasts. But after a financial crisis, real estate bubble, and the dawning realization that the go-go returns of the '80s and '90s were anomalies, that goal may feel out of reach. It isn't if you plan right. Making your money last is a lifelong pursuit that starts with saving steadily and ends with spending down thoughtfully—that's what this package will help you do. Plus, in the story that follows, you'll see how to invest for the marathon ahead.

TO KEEP YOUR PORTFOLIO POWERED UP FOR THE MARATHON OF RETIREMENT INVESTING, YOU NEED A STRONG, DIVERSIFIED CORE AND THE KNOW-HOW TO MAKE ADJUSTMENTS ALONG THE WAY.

BY CAROLYN BIGGA PHOTOGRAPH BY TRAVIS RATHBONE

INVEST FOR THE **LONG RUN**

CANDY PROVIDES A QUICK FIX. Coffee gives you a brief burst of energy. When it comes to putting together a retirement portfolio, though, you need to think along the lines of an athlete's power bar: something to get you through the long haul.

The race isn't always easy. No doubt you'll experience periods in which the market puts you to the test, whether in the form of raging bears like those of 2000 and 2008 or the jolting volatility that's come with the climb back from the financial crisis. "And we know that's when investors make bad decisions," says Fran Kinniry, a principal in Vanguard's investment strategy group. What you need, then, is a long-term strategy that will help you stay the course and finish strong.

That starts with a diversified "core" of investments. From there, as you age, you'll make shifts that take into account your changing financial stamina. On the following pages you'll find model portfolios to carry you from your thirties to retirement, plus suggestions for investments—including low-cost funds from the MONEY 70. Want to exercise more muscle? Choose the "boost" option, which involves taking a bit more risk for the chance at more return. Even without this extra pop, though, the strong core you'll find here will help you reach retirement a winner.
